Computer Science student and self-taught developer.

Educational Background

- Computer Science at International Hellenic University (2020 - present)

Languages

- English (fluent)
- Greek

Projects

- Github: <https://github.com/arkatsy>

Skills

- **Main:** Javascript, Typescript, Node, REST APIs, React, Testing, Vite, Python.
- **Other:** Linux, PostgreSQL, Docker, Bash.

Experience

- Self study, Summer of 2019 - Present

Began self studying in mid-summer of 2019, a year prior to enrolling in University. During this time I dedicated myself to exploring and tinkering with programming, with a prime focus, but not limited, on the javascript language and its ecosystem.

Summary of accomplishments:

- Proficient in JavaScript, with a deep and robust understanding of the language's intricacies.
- Frontend expertise. Proficiency in understanding and working with modern declarative frameworks like React as well as implementing different patterns for creating robust UIs.
- Backend familiarity. Developed solid understanding of the tools and patterns used for backend applications and databases.
- In-depth knowledge of web tooling such as bundlers, static analysis and code transformation tools.
- Solid understanding of the inner workings of programming languages with focus on interpreters such as lexing, parsing, ASTs and code transformations.
